

Self Regional Healthcare

2016 Community Health Needs Assessment
Data Assessment

Introduction

The following 2016 Community Health Needs Assessment serves to fulfill the CHNA requirements for Edgefield County Hospital. The CHNA utilized population demographic data, medical utilization trends, and socio-economic influences specific to the Edgefield community. The purpose of the CHNA was to identify disease trends among the highest at risk and vulnerable groups with the objective of reinforcing preventative care, set up a medical home, reduce emergency department utilization, and provide therapeutic interventions as necessary. The CHNA allowed Edgefield County Hospital to identify three high risk categories, heart disease, diabetes, and behavioral health.

The Healthy Outcomes Plan (HOP) along with the interventions as provided by Edgefield County Hospital's rural health clinic, Peachtree Medical Center, serves as the implementation strategy for the CHNA.

A handwritten signature in black ink, appearing to read "C. Milanes", is positioned above a solid black horizontal line.

Carlos Milanes CEO

Edgefield County Hospital

Key Elements of CHNA Process

Sources and Process

Sources Used in Data Assessment Process

- **Community Commons:** public website that provides data, tools and stories to improve communities and inspire change. 90% of the secondary data was found on the community commons site. The site provides data and mapping capability to develop community health needs assessments.
- **Nielsen Claritas:** Nielsen Claritas demographics were used to create maps and tables of total population and breakdowns of certain other population segments. This information was pulled for all seven counties in the Self Regional Healthcare service area. 2016 and projected 2021 demographics were included.
- **2016 County Health Rankings:** This source is a collaboration between the Robert Wood Johnson Foundation and the University of Wisconsin Population Health Institute. It gives a general snapshot of how healthy each county is in relation to others in the same state. It measures and ranks both health outcomes and health factors that lead to those outcomes. Each indicator is weighed, standardized, and ranked in order to come up with an overall ranking of health for each county in South Carolina.
- **The Advisory Board Company-** The Inpatient and Outpatient Estimators were used at a county level to estimate % growth in utilization by disease state over the next five years.

Healthy People 2020 Vision

A society in which all people live long, healthy lives.

Healthy People 2020 Mission

To improve health through strengthening policy and practice, Healthy People will:

- Identify nationwide health improvement priorities;
- Increase **public awareness and understanding of the determinants of health**, disease, and disability and the opportunities for progress;
- Provide measurable objectives and goals that can be used at the national, state, and local levels;
- Engage **multiple sectors to take actions** that are driven by the best available evidence and knowledge;
